## Alabama Environmental Health Association, Inc.

*Supporting Education in Environmental Health*

*<http://www.AEHA-online.com>*

A Message from the President,

Greetings! I would like to thank you for your interest in the Alabama Environmental Health Association (AEHA). If you are a current member, I would like to extend my sincere appreciation for your commitment to our organization. AEHA is fueled by the support of its members and exists, in turn, to provide value in the form of educational and networking opportunities to our members. If you are not currently a member, I would strongly encourage you to consider joining us in the pursuit of advancing the field of environmental health through professional development. By developing our capabilities as public health professionals, we not only better ourselves but ultimately, we better serve the citizens of Alabama.

In this day and age, it seems “do more with less” has become the mantra of many public health organizations. This is true for the private sector as well and spans all the specializations of environmental health. With increasing demands for our services as environmental health professionals, and the need to adapt to new and developing technologies and concerns, we need to constantly educate ourselves to maintain a high level of professional competency. AEHA works to ensure the capabilities of our members, as components of the environmental health workforce, maintain our high standards through education and networking opportunities provided by both regular chapter meetings and an annual state-wide conference.

If you are new to our organization, feel free to contact any of the members of our Board of Directors for more information, this includes myself as the President, or the chairperson for your area chapter.

Thank you for your interest in our organization and have a wonderful day.

Sincerely,

April Pearce, REHS  
President AEHA

***Providing continuing education to enhance skills while promoting high standards, professionalism, and cooperation among government, industry, and academia in environmentally related areas.***
